UP, India

Renown

ABOUT RENOWN POWER

Renown Power is a trusted name in earthing, lightning protection, and electrical safety solutions. We provide high-quality products and engineered solutions designed to protect infrastructure, equipment, and personnel from electrical hazards. With a focus on innovation, reliability, and customer satisfaction, we serve industrial, commercial, and infrastructure projects across India.

MISSION & VISION

Our Mission Is To Deliver Innovative And Reliable Electrical Safety Solutions That Enhance Operational Safety And System Performance. We Strive To Be A Trusted Industry Leader By Providing High-Quality Earthing And Lightning Protection Systems That Ensure Maximum Protection, Sustainability, And Customer Satisfaction.

6+ Years Experience

200+ Projects

PREMIUM QUALITY 100% GUARANTEE

100+ Happy Clients

24/7 Support

OUR PRODUCTS

Maintenance-Free Earthing

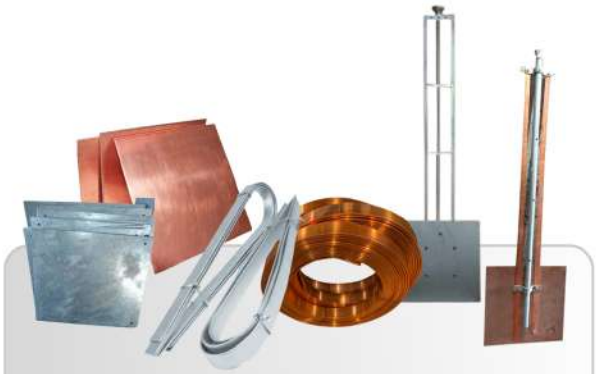

Plate Earthing

Surge Protection Device

Lighting Arrester

GI EARTHING ELECTRODE

GI Earthing Electrode is designed to provide an effective and reliable grounding system for electrical installations. Manufactured from high-quality galvanized iron and coated with a protective zinc layer, it ensures excellent conductivity, superior corrosion resistance, and long-lasting performance. It is widely used in industrial, commercial, and infrastructure applications to safely dissipate fault currents and maintain electrical safety.

MODEL	DIA	LENGTH
RES48GI	48MM	1/2/3 MTR
RES58GI	58MM	1/2/3 MTR
RES76GI	76MM	1/2/3 MTR
RES88GI	88MM	1/2/3 MTR

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ Manufactured from high-quality galvanized iron
- ✓ Zinc coating provides enhanced corrosion resistance
- ✓ Ensures effective fault current dissipation
- ✓ Suitable for normal and moderately corrosive soil conditions
- ✓ Maintenance-free performance
- ✓ Available in various sizes and shapes as per customer requirements

MAINTENANCE FREE EARTHING

PURE COPPER ELECTRODE

Pure Copper Electrode is manufactured from high-purity copper to provide exceptional electrical conductivity and reliable grounding performance. Its superior corrosion resistance and robust construction ensure long-term durability and consistent performance. Designed for efficient fault current dissipation, it is widely used in industrial, commercial, telecom, and power applications where dependable earthing is critical.

MODEL	DIA	LENGTH
RES48PCE	48MM	1/2/3 MTR
RES50PCE	58MM	1/2/3 MTR
RES76PCE	76MM	1/2/3 MTR
RES88PCE	88MM	1/2/3 MTR

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ High-purity copper construction
- ✓ Suitable for critical grounding applications
- ✓ Reliable performance in varied soil conditions
- ✓ Efficient fault current dissipation
- ✓ Maintenance-free performance
- ✓ Available in various sizes and shapes as per customer requirements

MAINTENANCE FREE EARTHING

COPPER BONDED ELECTRODE

Copper Bonded Electrode is manufactured using a high-strength steel core molecularly bonded with a layer of high-purity copper, ensuring excellent electrical conductivity and superior mechanical strength. It offers outstanding corrosion resistance, long service life, and reliable grounding performance, making it an ideal choice for industrial, commercial, telecom, and power applications.

MODEL	DIA	LENGTH
RES48CuB	48MM	1/2/3 MTR
RES58CuB	58MM	1/2/3 MTR
RES76CuB	76MM	1/2/3 MTR
RES88CuB	88MM	1/2/3 MTR

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ Excellent electrical conductivity
- ✓ Molecularly bonded copper layer for enhanced durability
- ✓ High mechanical strength and reliability
- ✓ Cost-effective alternative to pure copper electrodes
- ✓ Suitable for all soil conditions
- ✓ Maintenance-free performance
- ✓ Available in various sizes and shapes as per customer requirements

MAINTENANCE FREE EARTHING

COPPER BONDED ROD

Copper Bonded Rod is designed to provide efficient and reliable grounding performance for electrical systems. Manufactured with a high-strength steel core and a high-purity copper bonded coating, it offers excellent conductivity, superior corrosion resistance, and long-lasting durability for a wide range of earthing applications.

MODEL	DIA	LENGTH
RES17.2CBR	17.2MM	1/2/3 MTR
RES19.2CBR	19.2MM	1/2/3 MTR
RES20.2CBR	20.2MM	1/2/3 MTR

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ 99.9% Copper Coated
- ✓ Excellent electrical conductivity
- ✓ Superior corrosion resistance
- ✓ High mechanical strength and durability
- ✓ Low maintenance requirements
- ✓ Suitable for harsh environmental conditions
- ✓ Maintenance-free performance
- ✓ Available in various sizes and shapes as per customer requirements

MAINTENANCE FREE EARTHING

SOLID COPPER ROD

Solid Copper Rod is manufactured from high-purity copper to provide exceptional electrical conductivity and reliable grounding performance. Its solid copper construction offers excellent corrosion resistance, long service life, and consistent earthing performance, making it ideal for critical industrial, commercial, and infrastructure applications.

MODEL	DIA	LENGTH
RES14SCR	14MM	1/2/3 MTR
RES16SCR	16MM	1/2/3 MTR
RES18SCR	18MM	1/2/3 MTR

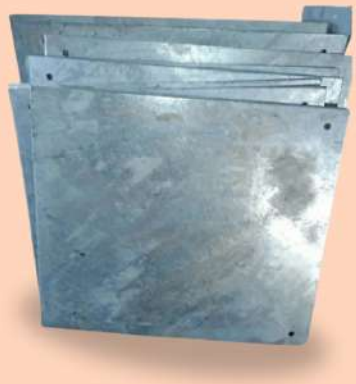

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ Manufactured from high-purity solid copper
- ✓ Excellent electrical conductivity
- ✓ High durability and mechanical strength
- ✓ Reliable fault current dissipation
- ✓ Suitable for all soil conditions
- ✓ Reliable fault current dissipation
- ✓ Ideal for critical earthing applications
- ✓ Maintenance-free performance
- ✓ Available in various sizes and shapes as per customer requirements

MAINTENANCE FREE EARTHING

GI PLATE

GI Plate is a durable and cost-effective earthing solution designed to ensure safe and efficient dissipation of fault currents. Manufactured from high-quality galvanized iron, it features a protective zinc coating that provides excellent corrosion resistance and long-term reliability. Its robust construction and consistent performance make it an ideal choice for industrial, commercial, and infrastructure earthing applications.

LENGTH	WIDTH	HEIGHT
600 MM	600 MM	6 MM
300 MM	300 MM	6 MM

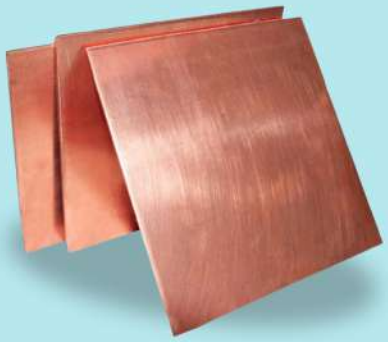

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ High-quality galvanized iron construction
- ✓ Zinc coating for enhanced corrosion resistance
- ✓ Effective fault current dissipation
- ✓ Ideal for industrial and commercial earthing systems
- ✓ Suitable for various soil conditions
- ✓ Strong and durable design
- ✓ Maintenance-free performance
- ✓ Available in various sizes and shapes as per customer requirements

PLATE EARTHING

COPPER PLATE

Renown Power Copper Plates are manufactured using high-purity copper to deliver exceptional electrical conductivity, superior corrosion resistance, and long-term durability. Designed for efficient fault current dissipation, these plates provide a dependable grounding solution for industrial, commercial, utility, and critical infrastructure applications where safety and performance are paramount.

LENGTH	WIDTH	HEIGHT
600 MM	600 MM	6 MM
300 MM	300 MM	6 MM

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ High-purity copper construction
- ✓ Superior corrosion resistance
- ✓ Efficient fault current dissipation
- ✓ Suitable for critical earthing applications
- ✓ Ideal for industrial and infrastructure projects
- ✓ High tensile strength and durability
- ✓ Excellent electrical conductivity
- ✓ Maintenance-free performance
- ✓ Available in various sizes and shapes as per customer requirements

PLATE EARTHING

GI STRIP

Renown Power GI Strips are manufactured from premium-quality galvanized iron, offering excellent mechanical strength, corrosion resistance, and dependable conductivity. Designed for efficient grounding and fault current dissipation, they are widely used in industrial, commercial, utility, and residential earthing systems to ensure long-term electrical safety and system reliability.

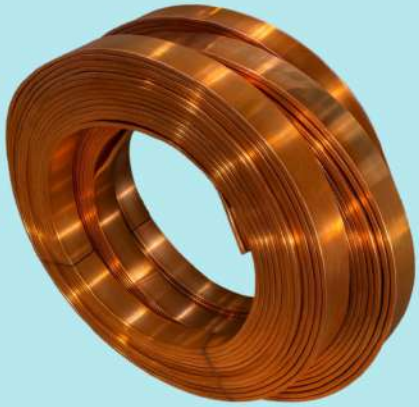

SIZE	25×3 mm	25×6 mm	32×6 mm	40×6 mm	50×6 mm	75×6 mm

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ Rapid fault current dissipation
- ✓ Excellent corrosion resistance
- ✓ Withstands harsh environmental conditions
- ✓ High mechanical strength
- ✓ Low maintenance requirements
- ✓ Long service life
- ✓ Reliable grounding performance
- ✓ Ideal for industrial and commercial earthing
- ✓ Maintenance-free performance
- ✓ Available in various sizes and shapes as per customer requirements

PLATE EARTHING

COPPER STRIP

Renown Power Copper Strips are manufactured from high-grade electrolytic copper to provide superior electrical conductivity, low resistance, and efficient fault current dissipation. Designed for demanding earthing and grounding applications, these strips offer exceptional corrosion resistance, mechanical strength, and long-term reliability, making them ideal for industrial, commercial, utility, and infrastructure projects.

SIZE	25×3 mm	25×6 mm	32×6 mm	40×6 mm	50×6 mm	75×6 mm

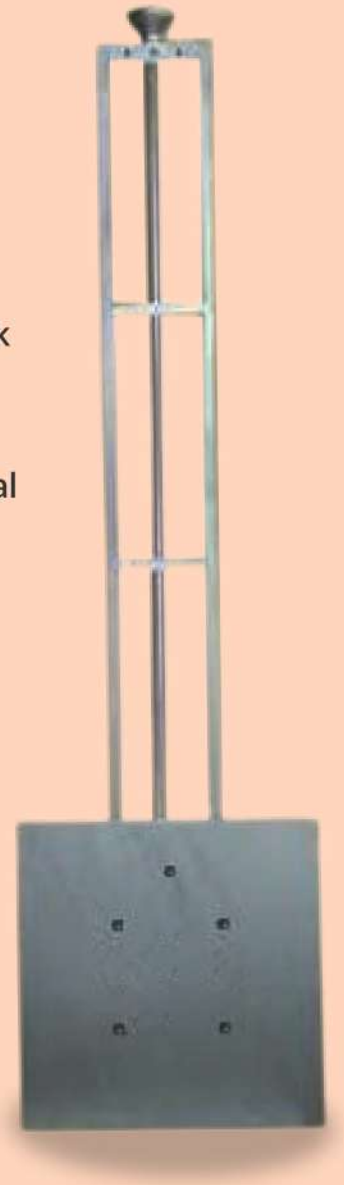

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ High-purity electrolytic copper
- ✓ Excellent electrical conductivity
- ✓ Superior corrosion resistance
- ✓ Efficient fault current dissipation
- ✓ Flexible and easy to install
- ✓ High tensile strength
- ✓ Long operational life
- ✓ Maintenance-free performance
- ✓ Available in various sizes and shapes as per customer requirements

PLATE EARTHING

GI PLATE EARTHING

Renown Power GI Plate Earthing systems are engineered to deliver reliable and long-lasting grounding performance in diverse environmental conditions. Manufactured from premium-grade galvanized iron, these electrodes ensure effective dissipation of fault currents while minimizing the risk of electrical hazards. Their robust construction, superior corrosion resistance, and consistent performance make them an ideal choice for industrial plants, commercial buildings, power distribution networks, telecommunications infrastructure, and residential projects requiring dependable earthing solutions.

LENGTH	WIDTH	HEIGHT
600 MM	600 MM	6 MM
300 MM	300 MM	6 MM

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ Premium galvanized iron construction
- ✓ Superior corrosion resistance
- ✓ Suitable for all weather conditions
- ✓ High mechanical strength
- ✓ Ideal for industrial & utility applications
- ✓ Maintenance-free performance
- ✓ Available in various sizes and shapes as per customer requirements

PLATE EARTHING

COPPER PLATE EARTHING

Renown Power Copper Plate Earthing is manufactured using high-purity copper to provide excellent conductivity, low earth resistance, and reliable fault current dissipation. Designed for long-term performance, it offers superior corrosion resistance and dependable grounding for industrial, commercial, and critical infrastructure applications.

LENGTH	WIDTH	HEIGHT
600 MM	600 MM	3 MM
300 MM	300 MM	3 MM

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ Superior electrical conductivity
- ✓ Low earth resistance performance
- ✓ Excellent corrosion resistance
- ✓ Long-lasting service life
- ✓ Uniform copper coating thickness
- ✓ Suitable for all soil conditions
- ✓ Reliable fault current dissipation
- ✓ Maintenance-free performance
- ✓ Available in various sizes and shapes as per customer requirements

PLATE EARTHING

BACK FILL COMPOUND

Renown Power Back Fill Compound is a specially engineered soil enhancement material designed to improve the effectiveness of earthing systems by reducing soil resistivity and increasing conductivity around the electrode. Formulated using high-quality conductive minerals, it helps maintain consistent grounding performance even in dry, rocky, or challenging soil conditions. The compound enhances fault current dissipation, minimizes corrosion around the electrode, and extends the overall lifespan of the earthing system.

MODEL	QUANTITY	NO. OF BAGS
RES15GEM	15 KG	1
RES25GEM	25 KG	1

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ Reduces soil resistivity
- ✓ Improves grounding efficiency
- ✓ Long-lasting performance
- ✓ Suitable for various soil conditions
- ✓ Cost-effective earthing solution
- ✓ Corrosion-resistant formulation
- ✓ Maintenance-free performance
- ✓ Available in various sizes and shapes as per customer requirements

PLATE EARTHING

POLYPLASTIC PIT COVER

Renown Power's Polyplastic Pit Covers are designed to provide reliable protection for earthing chambers across residential, commercial, and industrial applications. Manufactured from high-quality polymer materials, these covers offer excellent strength, durability, and resistance to corrosion and harsh weather conditions. Their lightweight yet robust construction ensures easy installation and maintenance while protecting critical grounding systems from external damage. Designed for long-lasting performance, they are an ideal solution for modern electrical earthing installations.

AT TOP	AT BOTTOM	HEIGHT
300 MM	300 MM	260 MM

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ High Mechanical Strength for Enhanced Durability
- ✓ UV-Stabilized and Weather-Resistant Material
- ✓ Corrosion & Chemical Resistant
- ✓ Suitable for Residential, Commercial & Industrial Use
- ✓ Lightweight Yet Highly Durable
- ✓ Protects Earthing Chambers Effectively
- ✓ Long Service Life with Minimal Maintenance
- ✓ Maintenance-free performance
- ✓ Available in various sizes and shapes as per customer requirements

PLATE EARTHING

LIGHTING ARRESTER PRODUCT

ESE LIGHTNING ARRESTER

Renown Power's ESE (Early Streamer Emission) Lightning Arrester is engineered to provide superior protection against lightning strikes by intercepting and safely directing electrical discharge to the ground before it reaches the structure. Designed in accordance with international standards, the system offers an extended protection radius, enhanced reliability, and long-term performance. Its corrosion-resistant construction and maintenance-friendly design make it an ideal solution for industrial facilities, commercial buildings, residential complexes, and critical infrastructure requiring dependable lightning protection.

ESE LIGHTNING ARRESTERS
AS NCF STANDARD

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ Early Streamer Emission (ESE) Technology
- ✓ Wider Coverage Area with Fewer Air Terminals
- ✓ Rapid Response to Lightning Activity
- ✓ Robust Corrosion-Resistant Construction
- ✓ Minimal Maintenance & Operational Costs
- ✓ Maintenance-free performance
- ✓ Available in various sizes and shapes as per customer requirements

CONVENTIONAL LIGHTNING ARRESTER

Renown Power's Conventional Lightning Arrester is designed to provide safe and effective protection against lightning strikes by directing electrical discharge safely to the ground. Manufactured using high-quality conductive materials, it ensures excellent durability, reliable performance, and long service life. Its robust construction makes it suitable for industrial, commercial, and residential applications, offering dependable protection in diverse environmental conditions.

MODEL	DIA	LENGTH
RES14CLA	14MM (CUSTOMIZED)	1/2 (CUSTOMIZED)
RES16CLA	16MM (CUSTOMIZED)	1/2 (CUSTOMIZED)

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ Durable and Corrosion-Resistant Construction
- ✓ Safe Lightning Current Dissipation
- ✓ Simple and Reliable Design
- ✓ Long Service Life and Consistent Performance
- ✓ Effective Protection Against Direct Lightning Strikes
- ✓ Designed for All Weather Conditions
- ✓ Maintenance-free performance
- ✓ Available in various sizes and shapes as per customer requirements

LIGHTING ARRESTER PRODUCT

SURGE PROTECTION DEVICE

SURGE PROTECTION DEVICE

Renown Power's Surge Protection Devices (SPDs) are designed to safeguard electrical systems and sensitive equipment from transient voltage surges caused by lightning strikes, switching operations, and power fluctuations. Engineered for reliable performance and long-term durability, these devices help prevent equipment damage, minimize downtime, and ensure uninterrupted operations. Suitable for industrial, commercial, and residential applications, they provide an essential layer of protection for modern electrical infrastructure.

MODEL	PHASE
SPD	SINGLE PHASE
SPD	THREE PHASE

⚠ Disclaimer: Image shown is for reference only. Actual product may vary.

- ✓ Rapid Response to Voltage Surges
- ✓ Protects Sensitive Electrical Equipment
- ✓ High Surge Current Handling Capacity
- ✓ Reliable Performance in Harsh Conditions
- ✓ Suitable for Single & Three Phase Systems
- ✓ Reduces Equipment Downtime and Failure
- ✓ Enhances Electrical System Safety
- ✓ Ideal for Industrial, Commercial & Residential Applications

INDUSTRIES WE SERVE

Renown Power delivers reliable electrical safety solutions for industrial and commercial applications, ensuring enhanced protection, operational continuity, and long-term infrastructure reliability.

OUR TRUSTED CLIENTS

We are proud to partner with leading organizations across diverse industries, delivering reliable earthing, lightning protection, and electrical safety solutions tailored to their operational needs.

APPROVED BY

Our products comply with recognized industry standards and certifications, reflecting our commitment to quality, safety, and performance across every project.
